 - Limiting investments to the types of securities listed in Section D of this policy.
 - Pre-qualifying financial institutions, brokers/dealers, intermediaries, and advisers with which the Agency will do business.
 - Diversifying the investment portfolio so that the potential impact of losses will be minimized.
 - b. Interest rate risk. The Agency will minimize interest rate risk, which is the risk that the market value of the securities in the portfolio will fall due to changes in market interest rates by:
 - Structuring the investment portfolio so that securities mature in a manner that cash requirements for ongoing operations will be met, thereby avoiding the need to sell securities on the open market prior to maturity; and
 - Investing operating funds primarily in short-term securities, money market mutual funds, or similar investment pools and limiting the average maturity of the portfolio in accordance with Section H.4.
2. Liquidity. The Agency's investment portfolio will remain sufficiently liquid to meet all operating requirements. Liquidity will be determined by the flow of revenues and expenditures using cash flow projections and historical data.
3. Yield. Thereafter, the highest yield consistent with safety is required, provided the maturities are short enough to maintain operational liquidity.

4. Location. It is the Board's intent to have the majority of the available funds invested in local institutions provided the institutions meet the minimum credit standings set out below and yields are competitive.

 - f. Recommendations and strategy for an appropriate resolution.
3. The Director of Risk Management will maintain a written litigation management program, attorney billing guidelines, and procedures for selecting and retaining defense counsel as specified in more detail in the Agency's Management Policies & Procedures.

J. Review of Agency Contracts and Documents (revised 11/29/23). The Director of Risk Management, in consultation with the Agency's Chief Legal Counsel as needed, will review Agency contracts, leases, agreements, easements or other documents that transfer risk, specify indemnity obligations, or require specific insurance from one or more of the parties.

Section 30.070

Hedging (effective 2/23/2001; revised 11/20/15; revised 06/25/21)

A. General. Because of the nature of its responsibilities to the St. Louis Metropolitan region, the Bi-State Development Agency (Agency) manages financial risks attributed to the price variability of fuel usage. This risk can be managed effectively through the use of hedging techniques. The purpose of this policy is to generally outline how the Agency will manage these risks, what techniques will be employed, and the general guidelines to be followed.

B. Definition. A hedge is a financial tool used to reduce the risk associated with normal business activities of buying fuel. The purpose of this hedging program is not to make or lose money but to manage risk. This program is not an investment and should not be construed as such. Realized gains or losses will be considered as an element of fuel cost. A hedging program will:

- a. seek to decrease the volatility of fuel cost;
- b. seek to increase the likelihood that actual net fuel cost will remain below the budgeted cost;
- c. seek to increase the certainty of future fuel cost;
- d. seek to attain a lower overall cost of fuel in the long-term;
- e. seek to manage year-over-year changes in fuel cost.

C. Program Infrastructure.

- a. Instruments. The agency will maintain a futures account with a Futures Commission Merchant Broker, which may be a separate entity from the Advisor. The Agency, through the management and direction of an Advisor, acquires, holds, and disposes of fuel futures contracts in the operation of its program. The high correlation between the movement of the price that the Agency pays for its fuel and the movement of the value of the futures contracts produces the program's effectiveness as a hedge. Due to the liquidity of the futures contracts purchased, these contracts do not require an investment grade rating.
- b. Maximum Hedge Ratio. The Agency's volume of fuel consumption is predictable and without significant variability over time. Given this, the maximum hedge ratio will be limited to 95% of forecasted consumption.
- c. Maximum Hedge Maturity. To allow the establishment of cost certainty in current and future budget periods, the maximum maturity of the futures contracts taken in conjunction with the program is 36 months forward from the acquisition date.
- d. Exiting Market Conditions. The advisor will exit the futures contracts evenly through time to coincide with the fuel supply contract pricing mechanism. This even liquidation of futures hedges through time and the even purchase of fuel via the Agency's fuel supply process assures the effectiveness of the hedging process. Based on the difference between the hedge price (entry price) and the settlement price (exit price), there will be a realized gain/loss associated with the hedge that will appear in the futures account. Futures contracts will be held to maturity (exited when the corresponding fuel is purchased) and, in the normal operation of the program, there will be no interim trading or early exit allowed.

Exceptions to this include situations where the volume of forecasted fuel consumption decreases in which case the hedge position may be adjusted to comply with the Maximum Hedge Ratio.

D. Physical Supply. The physical supply of fuel will be purchased according to the Agency's procurement policies, and will be priced according to the fuel supply contract.

E. Strategy. The Strategy is how the program's objectives are achieved. The strategy will utilize a process:

- a. that addresses market opportunities and market risks;
- b. that examines fundamental and technical market factors in the hedge decision-making process;
- c. that holds the risk of exceeding budget at or below an acceptable level;
- d. that uses historical pricing ranges as pricing parameters;
- e. that is continuously applied through time;
- f. that will take advantage of the inherent "dollar cost averaging" properties of a continuous hedging program;
- g. that mitigates transaction timing risk by making more numerous smaller volume transactions.

These things will be accomplished by the advisor executing the appropriate transactions at the appropriate times to create the desired effect within the constraints of the policy.

Risk Management. The Agency will engage only in financial hedge transactions that are related to the Agency's principal business, including the operation of diesel buses and vans. The Agency will only trade specific contracts as necessary to hedge for the pricing of fuel/energy costs, as related to these areas of business, and as advised by the Advisor.

F. Execution, Reporting and Oversight.

- a. The advisor will be responsible for the day-to-day execution of the program including the execution of transactions, generating reports on the program's status and results, and monitoring the program and the energy markets. The advisor will generate periodic updates on the status and results of the program.
- b. The Treasury Department will provide the Board of Commissioners with a summary of its activity through the quarterly Treasurer's Report.
- c. A Hedge Committee will oversee the activities of this program. The Committee shall include Chief Financial Officer, Director of Treasury, Assistant Executive Director Transit Assets, and the Vice President of Procurement, Inventory Management & Supplier Diversity. The role of the Hedge Committee will be to determine whether a proposed hedging strategy, transaction or group of transactions is consistent with this Hedge Policy and review the performance of the hedging activity on a periodic basis. The Hedge Committee will meet no less than quarterly, and meeting minutes and Committee decisions will be documented and approved by the Committee.

Section 30.080

C. Revenue Bonds.

I. General Management Policies

The Agency will provide for a periodic review of its financial performance, and review its performance relative to the financial policies outlined herein. These financial policies will be taken into account during the capital planning, budgeting and fare-setting process.

- A. In recognition of periodic changes in the cost of providing service to system users, service costs and fees will be reviewed annually and adjusted commensurately.
- B. The Agency may present proposed adjustments to existing fares, rates, fees and charges at public meetings, and will consider recommendations and input from the public as it relates to such proposed changes.
- C. All Agency funds will be invested according to the Investment Policies of the Agency.
- D. Necessary appropriations for annual debt service requirements will be routinely included in the Agency's annual budget.
- E. The Agency will maintain proactive communication with the investment community, including rating agencies, credit enhancers and investors, to ensure future capital market access at the lowest possible rates.
- F. The Agency may appoint a special committee of local financial experts to assist management as it develops financial plans. G. Fund co-mingling and inter-fund borrowing.

Transit is presently comprised of the following funds:

- Revenue Fund
- Operating Fund
- Internally Restricted Fund (Special Sales Tax Capital Fund)
- Debt Service Fund
- Sales Tax Capital Fund
- Prop M Fund
- Prop A Fund
- FTA Capital Fund
- Illinois Allocated Fund
- Private Capital Fund
- Internal Service Funds (Property, Casualty, Workers Compensation, and Medical) Excess Judgement Fund

The Agency maintains one bank depository account for operational and working capital purposes, which is comprised of the Operating, Internally Restricted, and Sales Tax Capital. While these funds are co-mingled in a single bank account, specific accounting is maintained on the Agency's books at the fund level.

Transit operations have little seasonality and are generally consistent throughout the year. Contractual funding and the annual appropriation process for state, local and federal formula funding provides approximately 95% of the Agency's funding. The annual appropriation process commences after the fiscal year begins. Local appropriations are subject to the legislative process, and Federal appropriations can be delayed up to 12 months. Consequently, Agency staff is

authorized to transfer (borrow) funds within the groups identified above in order to maintain operational liquidity and adequate working capital.

In the event the above funds are exhausted, temporary operating deficits may be funded by unencumbered Self Insurance, Prop M and Prop A Funds. Staff shall inform the Board any time the local funding jurisdictions fail to provide funds within ninety days of the beginning of the fiscal year. Management shall recommend a course of action up to and including service interruption for the jurisdiction in question.

Furthermore, the Agency utilizes the Transit Operating Fund to fund disbursements for accounts payable and payroll. The Transit Operating account funds payments for transit and business enterprise obligations. Liability accounts shall be maintained for the recording of all payments made by Transit for Business Enterprises, and Business Enterprises shall reimburse Transit, in the following month, for any such payments.

II. Financial Management Policies

The Agency utilizes a comprehensive planning process to determine its long-term capital needs. The Agency evaluates each capital project in relation to established federal, state and local grants and assistance programs and levels of reserves, current rate structure, expected asset life/replacement timeline, and available revenue sources to ensure that adequate financial resources are available to support the Agency's financial obligations. The Agency's Debt and Financial Management, Investment, and Swap Policies are integrated into the decision-making framework utilized in the budgeting and capital improvement planning process. As such the following policies outline the Agency's approach to debt management:

- A. The Agency will evaluate financing for each capital project on a case-by-case basis. The Agency will seek to pay for all capital projects from current revenues, federal grants and assistance programs and available reserves prior to or in combination with the use of debt.
- B. The Agency will seek to issue debt only in the case where there is an identified source of repayment. Bonds will be issued to the extent that (i) projected fixed revenues are sufficient to pay for the proposed debt service together with all existing debt service covered by such fixed revenues, or (ii) additional projected revenues have been identified as a source of repayment in an amount sufficient to pay for the proposed debt.
- C. Debt issuance for a capital project will not be considered unless such issuance has been incorporated into the capital improvement plan (Long Range Financial Plan).
- D. The Agency shall issue a request for proposal for underwriting services prior to the issuance or refunding of bonds.

III. Debt and Capital Management Policies

The following policies formally establish parameters for evaluating, issuing, and managing the Agency's debt. The policies outlined below are not intended to serve as a list of rules to be applied to the Agency's debt issuance process, but rather to serve as a set of guidelines to promote sound financial management.

In issuing debt, the Agency objectives will be to:

- a. Achieve the lowest cost of capital;
- b. Maintain high credit ratings and access to credit enhancement;
- c. Preserve financial flexibility.

IV. Standards for Use of Debt Financing

When appropriate, the Agency will use long-term debt financing to: achieve an equitable allocation of capital costs/charges between current and future system users; to provide more manageable rates in the near and medium term; and to minimize rate volatility.

- A. For growth related projects, debt financing will be utilized, as needed, to better match the cost of anticipated facility needs with timing of expected new connections to the system.
- B. The Agency shall not construct or acquire a facility if it is unable to adequately provide for the subsequent annual operation and maintenance costs of the facility throughout its expected life.
- C. Capital projects financed through debt issuance generally will not be financed for a term longer than the expected useful life of the project.
- D. Lease Agreements and Installment Sale Agreements shall be considered as an alternative to long-term debt. Although these forms of alternative financing are subject to annual appropriation, they shall be considered as long-term fixed rate debt for the purposes of this policy until maturity.

V. Financing Criteria

Each debt issuance should be evaluated on an individual basis within the framework of the Agency's Long Range Financing Plan, as well as within the context of the Agency's overall financing objectives and current market conditions.

The Agency will evaluate alternative debt structures (and timing considerations) to ensure the most cost-efficient financing under prevailing market conditions.

- A. Credit Enhancement – The Agency will consider the use of credit enhancement on a case-by-case basis. Only when clearly demonstrable savings can be realized shall a credit enhancement be utilized.
- B. Cash-Funded Reserve vs. Surety – The Agency may purchase a surety policy or replace an existing cash-funded Debt Service Reserve Fund when deemed prudent and advantageous.
- C. Call Provisions – In general, the Agency’s securities should include optional call provisions. The Agency will generally avoid the sale of non-callable long-term fixed rate bonds, absent careful evaluation of the value of the call option.
- D. Additional Bonds Test/Rate Covenants - The amount and timing of debt will be planned to comply with the additional bonds tests and rate covenants outlined in the appropriate legal and financing documents, and these policies.
- E. Short-Term Debt – The Agency may utilize short-term borrowing to serve as a bridge for anticipated revenues, construction financing or future bonding capacity.
- F. Use of Variable Rate Debt - The Agency will not issue variable interest rate debt unless: the proposed debt is converted to a fixed rate or hedged (for an interim period or to maturity) by use of a put-type mode, swap agreement or hedging mechanism (e.g., interest rate cap); outstanding un-hedged variable rate debt, including any proposed new variable debt, does not exceed the Agency’s “hedge position” (defined herein) in aggregate; or, interest is capitalized during the expected term that bonds will be outstanding in a variable rate mode. For this purpose, the Agency’s hedge position will be calculated as the Agency’s cash reserves multiplied by 125%.
Notwithstanding the above, the Agency will refrain from issuing new variable rate debt (including synthetic variable rate debt), whether hedged or unhedged, which exceeds 20 percent of the Agency’s aggregate debt outstanding.
- G. Use of Swaps & Derivatives - The use of any swap agreement in conjunction with the issuance or management of debt instruments will be governed by the Agency’s Swap Policy. The use of swaps to create synthetic fixed rate debt should generally be considered only such synthetic fixed rate debt would result in a 20% reduction in debt service vs. traditional fixed rate bonds.
- H. Investment of Bond Proceeds - Bond proceeds will be invested in accordance with the permitted investment language outlined in the bond documents for each transaction, unless further restricted or limited in the Agency’s Investment Policy. The preservation of funds, notwithstanding, the Agency will seek to maximize investment earnings within the investment parameters set forth in each respective bond indenture. The reinvestment of bond

proceeds will be incorporated into the evaluation of each financing decision; specifically addressing arbitrage/rebate position, and evaluating alternative debt structures and refunding savings on a “net” debt service basis, where appropriate.

VI. Refinancing Outstanding Debt

The Agency shall have the responsibility to evaluate potential refunding opportunities presented by underwriting and/or financial advisory firms. The Agency will consider the following issues when analyzing potential refinancing opportunities:

- (1) **Debt Service Savings** – The Agency shall establish a target savings level equal to 3% (current refunding) to 5% (advance refunding) of par refunded on a net present value (NPV) basis. These figures should serve only as a guideline, the Agency must evaluate each refunding opportunity on a case-by-case basis, and must take into consideration: the time to maturity, size of the issue, current interest rate environment, annual cash flow savings, and the value of the call option. Economic savings resulting from a refunding will generally be structured to occur on a level basis over the life of the refunding bonds. The decision to take all savings upfront or on a deferred basis must be explicitly approved by the Agency’s Finance and Audit Committee and Board of Commissioners.
- (2) **Restructuring** - The Agency may seek to refinance a bond issue on a non-economic basis in order to restructure debt, mitigate irregular debt service payments, accommodate revenue shortfalls, release reserve funds, comply with and/or eliminate rate/bond covenants, or terminate a swap.
- (3) **Term/Final Maturity** – The Agency may consider the extension of the final maturity of the refunding bonds in order to achieve a necessary outcome, provided that such extension is permissible under the Agency’s Compact and Federal tax law. The term of the bonds generally should not extend beyond the reasonably expected useful life of the asset being financed. The Agency may also consider shortening the final maturity of the bonds. The remaining useful life of the assets and the concept of inter-generational equity should guide these decisions.
- (4) **Escrow Structuring** - The Agency shall utilize the least costly securities available in structuring each escrow. A certificate will be required from a third-party agent who is not acting as a broker-dealer, stating that the securities were purchased through an arms-length, competitive bid process (in the case of open market securities), that such securities were more cost effective than State and Local Government Series Securities (SLGS), or that SLGS were not available at the time of the pricing of the escrow and that the price paid was reasonable and within Federal guidelines. The Agency retains the right to use SLGS at any time in structuring its escrows.

When evaluating the economic viability of an economic versus legal defeasance, the Agency shall take into consideration both the financial impact on a net present value basis as well as the rating/credit impact. The Agency shall take all necessary steps to optimize its escrows and to avoid negative arbitrage in any refunding.

VII. Method of Issuance

The Agency will determine, on a case-by-case basis, whether to sell its bonds competitively or through negotiation.

- A. Competitive Sale – In a competitive sale, the Agency’s bonds shall be awarded to the bidder providing the lowest true interest cost (“TIC”), as long as the bid adheres to requirements set forth in the official notice of sale.
- B. Negotiated Sale – The Agency shall assess the following circumstances that weigh toward the use of a negotiated sale:
 - 1. Issuance of variable rate or taxable bonds;
 - 2. Complex structure or credit considerations (such as non-rated bonds), which requires a strong pre-marketing effort;
 - 3. Significant par value, which may limit the number of potential bidders;
 - 4. Unique/ proprietary financing mechanism (such as a financing pool), or specialized knowledge of financing mechanism or process;
 - 5. Market volatility, such that the Agency would be better served by flexibility in the timing of its sale in a changing interest rate environment;
 - 6. When an Underwriter has identified new financing opportunities or presented alternative structures that financially benefit the Agency;
 - 7. As a result of an Underwriter’s familiarity with the project/financing, which enables the Agency to take advantage of efficiency and timing considerations.
- C. Private Placement – From time to time the Agency may elect to issue debt on a private placement basis. Such method shall generally be considered only if it is demonstrated to result in cost savings or provide other advantages relative to other methods of debt issuance, or if it is determined that access to the public market is unavailable and timing considerations require that a financing be completed.
- D. Conduit Issuance – The Agency may elect to enter into financing agreements with other issuers, including but not limited to the City of St. Louis, St. Louis County, and the Missouri Development Finance Board, to permit debt to be issued on the Agency’s behalf. The Agency will consider this approach if such an arrangement is expected to produce lower borrowing costs, enhance the flexibility of the Agency, or provide other operational efficiencies.

VIII. Market Communication, Debt Administration and Reporting Requirements

Rating Agencies and Investors – The Chief Financial Officer shall be responsible for maintaining the Agency's relationships with Moody's Investors Service, Standard & Poor's Ratings-Services, Fitch Ratings, Kroll Bond Rating Agency or any other nationally-recognized rating service. The Agency may, from time to time, choose to deal with fewer than all of these agencies as circumstances dictate.

In addition to general communication, the Chief Financial Officer shall: (1) meet with Credit Analysts periodically as requested, and (2) prior to each competitive or negotiated sale, offer conference calls with Agency analysts in connection with the planned sale.

- A. Board Communication – The Chief Financial Officer shall include in an annual report to the Finance and Audit Committee and the Board of Commissioners feedback from rating agencies and/or investors regarding the Agency's financial strengths and weaknesses and recommendations for addressing any weaknesses.
- B. Continuing Disclosure – The Agency shall remain in compliance with Rule 15c2-12 or any successor rule or regulation by filing its annual financial statements and other financial and operating data for the benefit of its bondholders within 270 days of the close of the fiscal year. The inability to make timely filings must be disclosed and would be a negative reflection on the Agency. While also relying on a timely audit and preparation of the Agency's annual report, the Chief Financial Officer will ensure the Agency's timely filing with each Nationally Recognized Municipal Securities Information Repository.
- C. Record-Keeping and Post-Issuance Compliance – A copy of all debt-related records shall be retained at the Agency's offices. Consistent with the Agency's tax compliance agreements and post-issuance compliance policy, at minimum, these records shall include all official statements, bid documents, bond documents/transcripts, resolutions, trustee statements, leases, records related to expenditure and investment of bond proceeds, records related to periodic reviews of the use of bond financed facilities, and title reports for each Agency financing (to the extent available). To the extent possible, the Agency shall retain an electronic copy of each document.
- D. Arbitrage Rebate – The use of bond proceeds and their investments must be monitored to ensure compliance with all Internal Revenue Code arbitrage rebate requirements. The Chief Financial Officer shall ensure that all bond proceeds and investments are tracked in a manner which facilitates accurate calculation; and, if rebate is due, such payments are made.

Section 30.090

Donation and Gift Policy (NEW effective 11/19/21)

A. Policy. It is the policy of the Agency that gifts and donations to the Agency are welcomed and encouraged. Gifts and donations are valued as expressions of individual support for the Agency's mission and help to enhance its services, programs and facilities by supplementing federal, state, or contractual support.

B. Types of Gifts. The Agency accepts the following types of gifts and donations: cash, tangible personal property, publicly traded and recognizable securities, real estate, bequests, trust funds and annuities.

C. Use of Gifts. The President and CEO or Board of Commissioners will carefully consider the needs of the Agency and will use a gift where it determines it is most needed, so that all donations may directly and indirectly support the public purposes of the Agency. The Agency may choose not to accept a gift if the donor wishes to place limitations or restrictions on its use or disposal. The Agency may refuse any gift that does not sufficiently benefit the Agency, is in conflict with the Agency's mission, puts the reputation of the Agency at risk, or is prohibited by law.

D. Acceptance of Gifts. The President and CEO may accept any gift or donation of the types described in Section B on behalf of the Agency. Other types of gifts and donations will be evaluated on a case-by-case basis by the Board of Commissioners

When processing each gift, the Agency will follow generally accepted accounting principles. The Agency takes no responsibility for valuing gifts for tax purposes or for the tax consequences to the donor.

All accepted gifts and donations become the property of the Agency. The Agency reserves the right to sell or otherwise dispose of non-monetary gifts, if the Board of Commissioners or President and CEO, determines that such sale or disposition is advisable or necessary.

E. Documentation. The Agency will retain a written receipt of each donation and gift identifying the name of the donor, the amount and the date of the donation or gift, and the nature of restriction on the gift, if any. The Agency will acknowledge each donation by letter, thanking the donor. Donors who make a significant financial or material donation will receive a contemporaneous written acknowledgement of the donation from the Agency.
